

AMENDMENTS TO THE CLAIMS

Claims 1 - 51 (cancelled).

52. (New) A radiator arrangement for a vehicle comprising:

a support including a lower portion;

a first radiator supported on and extending upwardly from said lower portion of said support;

a second radiator supported on and extending upwardly from said lower portion of said support;

a third radiator supported on and extending upwardly from said lower portion of said support;

a condenser supported on and extending upwardly from said lower portion of said support;

a fourth radiator supported on said first radiator, said second radiator, said third radiator, and said condenser, wherein said lower portion of said support, said first radiator, said second radiator, said third radiator, and said condenser cooperate to define a chamber; and

a fan deflector guide supported on said bracket externally of said chamber, said fan deflector guide adapted to support a fan thereon.

53. (New) The radiator arrangement defined in Claim 52 further including a bracket that is supported on and extends upwardly from said lower portion of said support, and wherein said first radiator is supported on said bracket.

54. (New) The radiator arrangement defined in Claim 52 wherein said second radiator has a plug element that is received in a matching counter element in said lower portion of said support.

55. (New) The radiator arrangement defined in Claim 52 wherein said second radiator has a plug element that is received in a matching counter element in said

lower portion of said support, and wherein said third radiator has a plug element that is received in a matching counter element in said lower portion of said support.

56. (New) The radiator arrangement defined in Claim 52 further including a frame that is pivotably support on said support, and wherein said condenser is supported on said pivotable frame.

57. (New) The radiator arrangement defined in Claim 52 wherein one of said first, second, third, and fourth radiators is an air-permeable plate.
